The Direction of the Ecole polytechnique fédérale de Lausanne hereby adopts the following:

**Section 1  General Provisions**

**Article 1  Objective**

1. The aim of the present directive is to define the rules and procedures governing the recycling and resale of IT equipment at EPFL, as well as the roles and responsibilities of the various actors involved.

2. The present directive and its annexes are applicable to all EPFL employees and students.

**Article 2  Definitions**

1. **IT equipment**: The equipment required for all computing activity (defined in Annex 1).

2. **Unit’s IT equipment**: The IT equipment entered in an EPFL Unit’s inventory.

3. **Value of equipment as described in the inventory**: The amount of the purchase order, or respectively the amount invoiced if this is different. Any discounts or costs relating to installation, delivery, customs or VAT must be included in the value of the equipment.

**Article 3  Notes**

1. All amounts indicated in the present document include VAT.

2. When an item of IT equipment is removed from the inventory, it may no longer benefit from any services provided by EPFL (e.g. repairs).

3. The acronyms used in the present document are defined in Annex 1.

**Article 4  Scope of application**

1. The present directive is applicable to all of a Unit’s IT equipment.

**Section 2  Procedure for the recycling and resale of IT equipment**

**Article 5  Recycling options**

A Unit’s IT equipment may be recycled in 6 different ways:

**A.** Reallocation within the School to which the Unit belongs (for Central Services, reallocation to another Central Service).

**B.** Resale to its user or to another employee of the Unit to which the equipment belongs, provided that the following condition is satisfied:

   - The Head of the Unit to which the equipment belongs agrees to handing over the equipment and possesses the necessary credits for any replacement required.

   ```
   C. Reallocation elsewhere within EPFL.
   ```

---

*a VAT is a non-deductible cost for EPFL.

*b Or any other Level 2 Unit for the Vice Presidencies.
D. Donation by the Information Systems Department to a non-profit institution. For special cases and with approval from the Information Systems Department, resale outside of EPFL is possible.

E. Return to the Information Systems Department for resale to any EPFL employee or student.

F. Physical destruction by the Information Systems Department in accordance with the regulations laid out by the association SWICO Recycling (possible prior recovery of single parts by the on-site support services team from the Information Systems Department).

Article 6 Order of priority for the 6 recycling possibilities

1. Schools\(^c\) may choose between the two following orders of priority:
   \[ A \rightarrow B \rightarrow C \rightarrow D \rightarrow E \rightarrow F \]
   or
   \[ B \rightarrow A \rightarrow C \rightarrow D \rightarrow E \rightarrow F \]

2. This choice will determine the School's recycling policy.

3. A unit has the possibility to directly reallocate IT equipment to the on-site support services team without having to go through the "bourse d'échange" of the inventory application (go directly to recycling case D).

Article 7 Procedures to follow

Recycling options A and C (reallocation within the Unit’s School or elsewhere in EPFL):

1) When following recycling option A and in accordance with the recycling policy adopted by the School, the Unit to which the item belongs signals the availability of the equipment to the School via the "exchange platform" on the inventory application or directly to the School IT Manager (for Central Services, the item must be signalled to the Information Systems Department). If no interest is shown from within the School in the month which follows, the Unit to which the equipment belongs shall either apply recycling option B or accept the reallocation of the equipment elsewhere in EPFL (recycling option C).

2) The equipment is directly transferred by the Inventory Coordinator and via the inventory application from the Unit to which it belonged to the Unit to which it has been reallocated. This scenario requires approval from the Head of the Unit which wishes to submit the equipment for reallocation and from the Head of the Unit wishing to acquire the equipment. The Unit to which the equipment initially belonged must irreversibly remove all data carriers from the IT equipment as well as all software and/or data rightfully belonging to EPFL.

Recycling option B (resale to an employee of the Unit to which the equipment belongs):

The price of resale is set according to the equipment type (central unit, screen, laptop, etc.), depending on the Value of the equipment as described in the inventory (V) or its purchase value (if it isn’t in the inventory) and the date of its entry into service (DMS). The applicable rules for the calculation of a price of resale are as follows:

a) For equipment for which the value V is equal to or below CHF 5000.00, and which:
   - is less than 5 years old (current date – DMS), the price of resale is based on a linear annual depreciation rate of 25% of V (prorata temporis), with a minimum price of CHF 250.00 for equipment where V > CHF 1000.00 and a minimum price of CHF 50.00 for equipment where V ≤ CHF 1000.00.
   - is over 5 years old, the price of resale is CHF 50.00.

\(^c\) Or any other Level 2 Unit for the Vice Presidencies.
b) For equipment for which the value V exceeds CHF 5000.00 the price of resale is based on a linear annual depreciation rate of 15%, with a minimum amount of CHF 50.00.

4) This amount shall be credited by the employee to an EPFL fund destined for usage in IT (an Information Systems Department central fund and not a fund for the Unit to which the equipment belongs).

5) This scenario requires approval from the Head of the Unit to which the equipment belongs and potentially also approval from the School IT Manager, depending on the recycling policy of the School.

6) The item of equipment will automatically be removed from the inventory once payment has been completed.

7) All resale of IT equipment must pass by the on-site support services team, which is responsible for the irreversible removal of data carriers and for the possible installation of the original Operating System.

Recycling options D, E and F (donation, resale to EPFL students or employees, physical destruction):

8) The Unit to which the equipment belongs must complete the following actions:
   a) The Inventory Coordinator must reallocate the equipment to the on-site support services team via the inventory application. This requires the approval of the Head of Unit.
   b) Once reallocation to the on-site support services team has been approved by the Head of Unit, the Unit to which the equipment belongs is responsible for depositing the equipment at the on-site support services team collection point.

9) Only the on-site support services team (or a person so delegated by the on-site support services team) has the authority to remove the equipment from the inventory.

10) For resale, the on-site support services team shall apply the prices defined in paragraph 3 of the present Article.

11) EPFL students or employees can see on the on-site support services team website the list of IT equipment for resale and the purchase terms and conditions.

Article 8 Roles and responsibilities

The roles regarding the recycling of IT equipment for a Unit are as follows:

1 Head of Unit
   - approves requests for the recycling of IT equipment for his/her Unit;
   - approves requests for the resale of IT equipment for his/her Unit to employees of the Unit to which the equipment belongs.

2 Inventory Coordinator
   - instigates all requests for the removal of equipment from the inventory, except in the case of resale.

3 School IT Manager
   - may approve requests for removal from the inventory or for the resale of a Unit’s IT equipment within the same School depending on the recycling policy adopted by that School;

4 Unit IT Administration:
   - responsible for the irreversible removal of data carriers for IT equipment recycled using options A and C.

5 On-site support services team:
   - responsible for the irreversible removal of data carriers and possible installation of an original Operating System for IT equipment recycled using options B, D, E or F;

Or any other Level 2 Unit for the Vice Presidencies.
- completes all necessary checks in order to ensure that the inventory data concerning the Unit’s recycled IT equipment is up to date;
- may delegate these responsibilities when dealing with EPFL outposts.

Information Systems Department Service Desk
- in the case of resale, prior to handing over the IT equipment to the new owner, the Information Systems Department Service Desk checks that the payment has successfully been completed and ensures the signing of a contract of sale.

Article 9  Abrogation and entry into force
The present directive entered into force 1st June 2019 (version 1.0), and was revised on 25th January 2021 (version 1.1).

On behalf of the EPFL Direction:

President:  Director of Legal Affairs:
Martin Vetterli  Françoise Chardonnens
Annex 1: Glossary

IT refers to anything concerning information technologies, such as networks, equipment, software, the internet, or persons working with these technologies.

IT equipment: For example, desktop or laptop computers, tablets, data carriers (mobile phones are the subject of a separate directive (Directive on Mobile Telephony (LEX 7.3.1))

SWICO: Swico Recycling is a national, not-for-profit system for recovering discarded electronic and electrical equipment used in the areas of computing, consumer electronics, office electronics, communications, the graphics industry and measurement and medical technology. Swico Recycling is operated by Swico, the Swiss Economic Association for the Suppliers of Information, Communication and Organisational Technology.

Annex 2: Graphics

Graphics illustrating the evolution of the price of resale as a function of the value of the equipment V:

Example 1: V = 800.-

Example 2: V = 2000.-
Example 3 : V=7000.-

Annex 3: Legal basis and supporting reference documents

- Ordinance on the Avoidance and the Disposal of Waste (Waste Ordinance, ADWO) of 4th December 2015 (Status as at 1st January 2019)
- Accounting manual of the ETH Domaine (under publication on Polylex)
- Directive on the Procurement of Goods and Services (LEX under consultation)
- EPFL Financial Regulations (LEX 5.1.1)
- Directive on the Use of Private Computer Equipment for Professional Purposes (LEX 6.1.3. under consultation)
- Directive d’inventaire à l’EPFL (LEX 5.9.1)
- Directive on Mobile Telephony (LEX 7.3.1)
- Ordinance for the Use of Software Subject to a License Agreement (LEX 6.1.5)
