

Double Deck

A New Teaching Hub at the Heart of the Campus

EPFL is launching the *Double Deck*, an ambitious project to adapt and extend its infrastructure to respond to the needs of a growing student population while preserving its educational excellence.

Designed by Dominique Perrault Architecture, this project includes the construction of a new iconic building on the Esplanade of EPFL and the renovation and modernisation of the existing spaces in the Coupole building. This new teaching hub will open its doors in 2028 and will mark a major turning point in the development of EPFL.

Students
in 10 years

1,500
New seats
for students

The spaces of the *Double Deck* are designed to promote interactive teaching methods and are equipped with cutting-edge technology to create a dynamic learning environment in line with current and future educational practices. This new building will feature modular rooms with a total of 1,500 new seats.

A commitment to sustainability:

- Directly addresses the need for more teaching spaces
- Introduces new paths for soft mobility on two levels to improve connectivity between different parts of the Campus
- Integrates seamlessly into the existing landscape thanks to a sustainable and ecological design
- Reuses materials from the demolition of the existing car park for the new construction

The *Double Deck* marks a decisive turning point for the future of education at EPFL.
