

Applied physics

Le tableau suivant résume les variantes possibles pour le stage obligatoire et vous indique quel statut indiquer dans la FRAC quand le stage se déroule pendant la période des cours.

Il est important que le statut indiqué dans la FRAC soit correct pour le bon déroulement des étapes administratives. Merci donc de lire attentivement le tableau et les remarques ci-dessous.

Les stages qui ont lieu en dehors des périodes de cours ne doivent pas être pris en compte pour la FRAC.

Applied physics				
Internship models	Credits	Status to be specified in FRAC	Semester taken into account in the duration of the studies	Notes
SCS, 4 à 6 months	30	Internship	Yes	The internship (SCS) may only be undertaken after two semesters in the Master's cycle.
PDME (25 weeks)	30	Present	Yes	

Important note:

- if, during the internship, the student would like to register for a course, s/he must set the FRAC status to PRESENT.
- if the internship has not been validated by the internship coordinator, the semester when the internship takes place will be taken into account in the duration of the studies. In that case, please select « **Personal internship, not registered in the EPFL internship portal** ».
- the extension of the duration of the mandatory internship beyond one semester will be considered like a personal internship

SCS: Internship with separate credits obtained during the Master's cycle

STAP: Internship not related to the Master's project, credited with the Master's project

PDME: Master's project in industry
