

Recruiting Talk

Monday, 24th April

5:15 pm

[Room BC 420](#)

>> Biography of D. E. Shaw Research's speakers :

Michael V. LeVine is a senior drug discovery scientist at D. E. Shaw Research on the Chemistry, Biology, and Drug Discovery team. His research focuses on the discovery of small molecules and peptides that modulate protein-protein and protein-nucleic acid interaction targets, as well as the development of computational drug discovery methods that leverage the Anton supercomputers. Michael received his Bachelors with high honors from Wesleyan University, where he triple majored in Chemistry, Molecular Biology & Biochemistry, and Neuroscience & Behavior, and received his PhD from the Physiology, Biophysics, & Systems Biology graduate program at Weill Cornell Medical College of Cornell University.

Aashima Jhingon, a member of our recruiting team, will talk about career opportunities, open positions (on our chemistry and drug discovery, computer science, machine learning, and engineering teams), and the application process at DESRES.
