

## Meet Your Future Employer

### ORACLE Labs Presentation & Tech Talk

#### Bios

**Alexandra Fritzen** (<https://www.linkedin.com/in/alexandra-fritzen/>) is a Senior Research Manager, leading several development teams who work on applications in the compliance space. Next to being a people manager, Alexandra acts as a product manager and communicates with customers to gather requirements, manages the ticket backlog, prioritizes and assigns work, and improves processes.

**Constantin Nicolae** (<https://www.linkedin.com/in/constantin-nicolae/>) is a seasoned Research Software Development Manager with 9 years of experience in the fields of machine learning, statistics and programming. He currently leads a cross-functional team at Oracle Labs in Zurich.

**Ioannis Alagiannis** (<https://www.linkedin.com/in/ioannisalagiannis/>) is a principal engineer at Oracle Labs, working on scalable graph analytics and vector similarity search in the Oracle Database. He received his Ph.D. from EPFL in 2015 and his research interests include big data analytics, adaptive query processing and analyzing performance of computer systems.

**Loïc Ottet** (<https://www.linkedin.com/in/loicottet/>) is a senior researcher working in GraalVM's Native Image team for the past 6 years. His main areas of work are implementing reflective operations in a closed-world environment, as well as targeting the compiler to the LLVM intermediate representation.
