

Raiders of the Eurocodes

Simon
PASQUIER

EPFL Library

**Coffee Lecture
#10**
25th May, 2021

Learning objectives

- Understand what Eurocodes are and how they are useful for civil engineering
- Learn how to get access to Eurocodes at EPFL

What are Eurocodes ?

- Eurocodes are 59 European Standards in the field of construction
- Eurocodes are organised thematically (0 for basis of structural design)

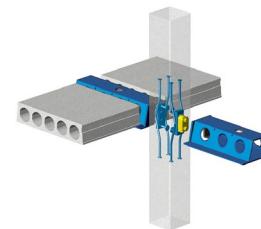

Actions on structures

Concrete structures

Steel structures

Composite Structures

Timber structures

Masonry structures

Geotechnical design

Earthquake resistance

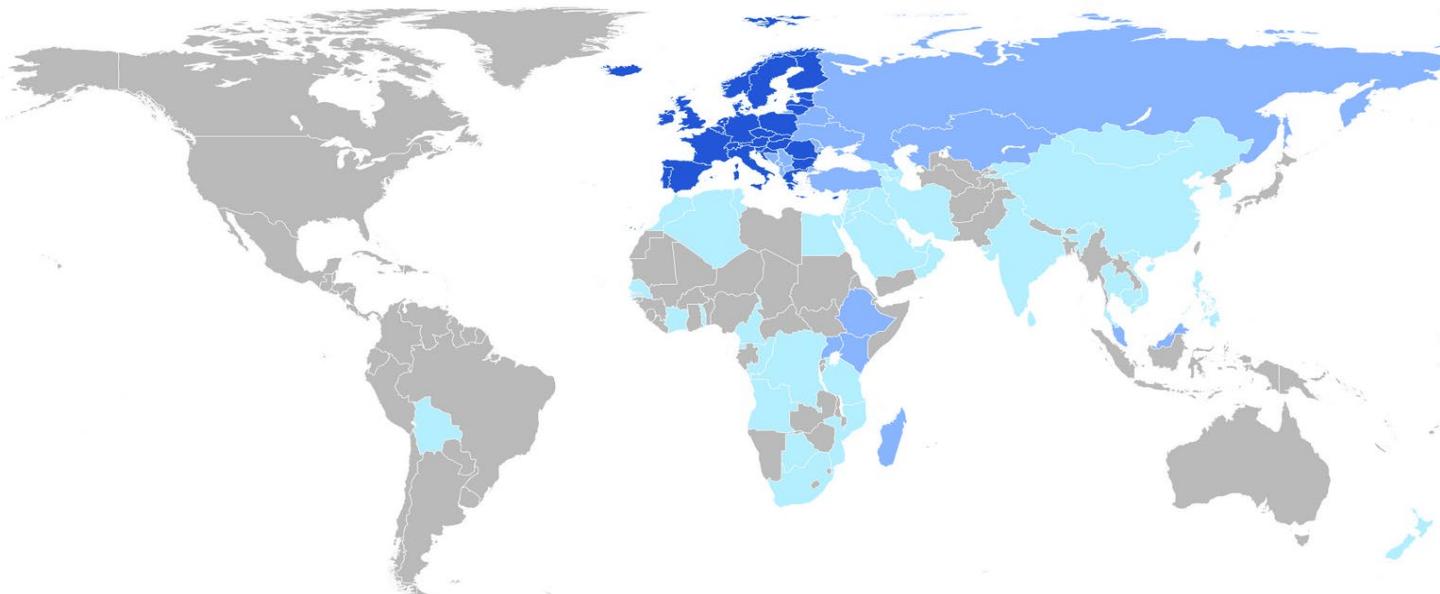

Aluminium structures

Practically, this means :

- Eurocode 0 = EN 1990
- Eurocode 1 = EN 1991-1 to EN 1991-4 (10 standards)
- Eurocode 2 = EN 1992-1 to EN 1992-4 (5 standards)
- Eurocode 3 = EN 1993-1 to EN 1993-6 (20 standards)
- Eurocode 4 = EN 1994-1 to EN 1994-2 (3 standards)
- Eurocode 5 = EN 1995-1 to EN 1995-2 (3 standards)
- Eurocode 6 = EN 1996-1 to EN 1996-3 (4 standards)
- Eurocode 7 = EN 1997-1 to EN 1997-2 (2 standards)
- Eurocode 8 = EN 1998-1 to EN 1998-6 (6 standards)
- Eurocode 9 = EN 1999-1 to EN 1999-5 (5 standards)

Why do we need Eurocodes ?

- Elimination of technical obstacles to trade
- Harmonisation of technical specifications

And the quest begin when you want to find an eurocode

- Each country use the eurocode by converting them in a national standard
- For example : the Eurocode 1 (EN 1991) will be the NF EN 1991 in France, SN EN 1991 in Switzerland, BS EN 1991 in UK, DIN EN 1991 in Germany...
- Each country use the eurocode with NDP : Nationally Determined Parameters
 - values where alternatives are given in the Eurocodes
 - values to be used where a symbol only is given in the Eurocodes
 - country specific data, like climatic or seismic zone maps
 - choices,where alternatives are given in the Eurocodes.
- NDPs could be :

At the EPFL Library, 2 ways to get the eurocodes

- Online quick access in reading mode only :
- check on our standards webpage under international Standards :
[\(https://www.epfl.ch/campus/library/collections/standards/\)](https://www.epfl.ch/campus/library/collections/standards/)
- **access for all EPFL Members..**this gives you an idea on the content of each eurocodes with the FR NDP.

At the EPFL Library, 2 ways to get the eurocodes

- Online specific **access for ENAC Researchers & Phd** : you have a local access to the SIA reader which include the Eurocodes (all SN EN)
- If you want the Swiss NDP, very easy.. Switzerland decided to not fix any NDP as SIA standards 260 to 267 already give the practical application of Eurocodes

And if you are still lost, contact the library
