

The background of the slide features a close-up photograph of a white ceramic coffee cup filled with dark coffee, sitting on a wooden desk. In the foreground, a spiral-bound notebook with lined pages is open, and a bright blue pen lies across it. A laptop is partially visible in the background, slightly out of focus.

Reuse content in my thesis

- Understand the particularities of reusing different types of content.
- Know how to request permission to reuse copyrighted content in a thesis.

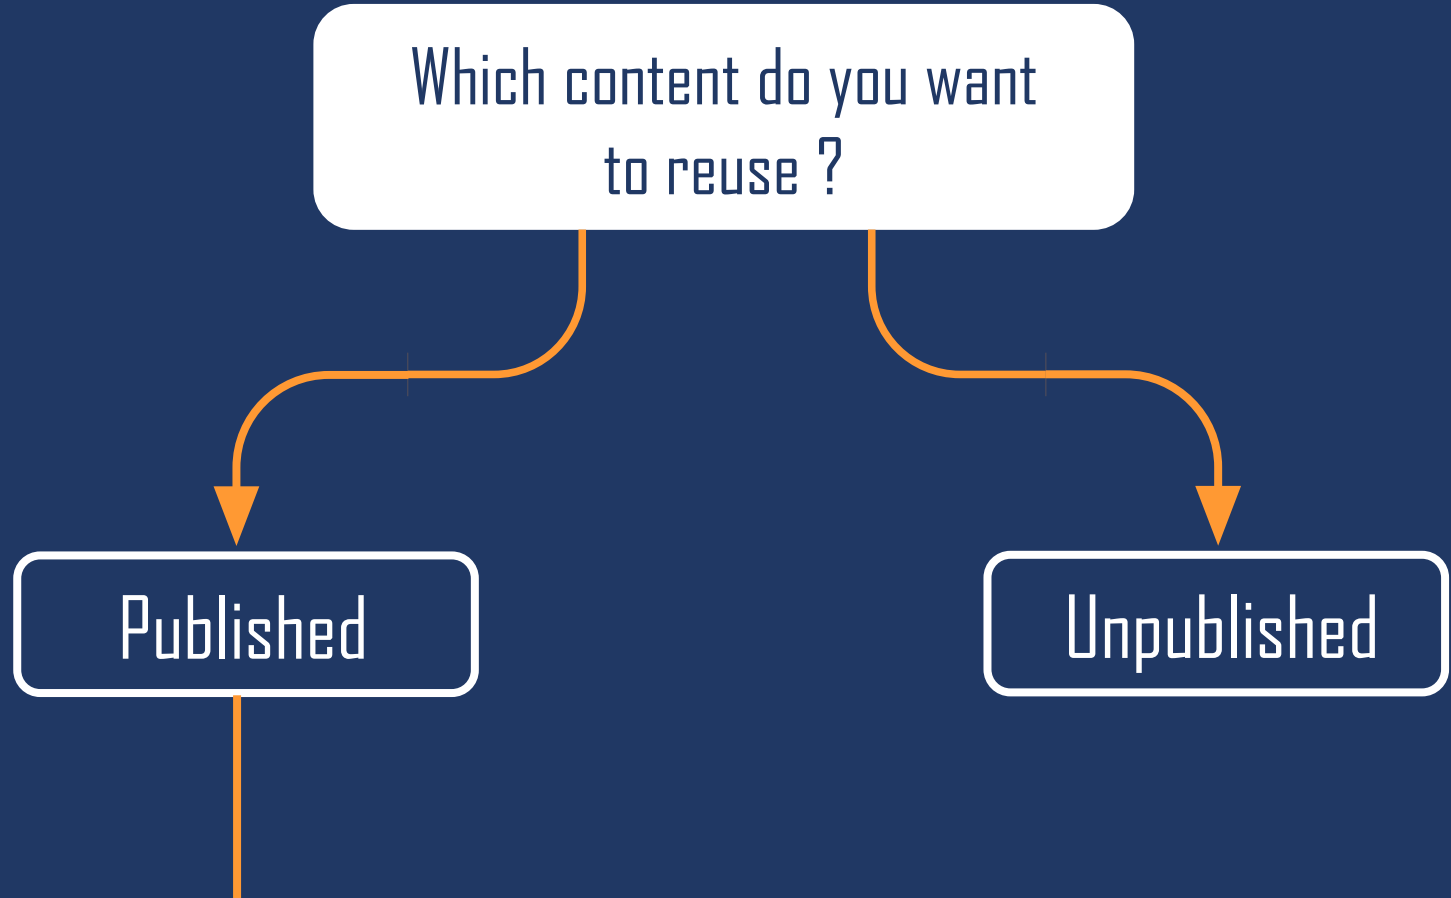

- Ordinance on the doctorate
- Theses are also framed by the “Directive concerning the citing and referencing sources of information in written work submitted” of LEX 1.3.3.
- The author is the copyright owner of his/her thesis.
- S.He is also responsible for its content

- A thesis is considered as a non-commercial publication.

Quote VS Reuse

- Citation/Quotation = cite and/or quote small extracts of works. Citation is a right, an exemption listed in the Swiss Copyright Law.
- Reuse = **reproducing a work (or an important part)** already created (published or not) in another work. It is not a right and generally requires **formal authorizations from the right holders**, unless the work is under a free license. And of course, reusing implies citing.
- **Rights holders (or owners)** are persons who own moral and/or exploitation rights of a work. In many cases, the rights owner will be the **publisher**.
- Important: all **images, figures and graphics are considered as works**.

re-draw, etc.

Ask for permission

- A thesis containing a compilation of articles published (or submitted/accepted for publication) in scientific journals is **not plagiarism, but requires** 1) to obtain the right to reproduce each article and 2) well contextualize the integration of the articles used in the thesis.
- Requirements defined by the Doctoral School:
 - “*Each section that was, or is to be, published as an article must comprise on its first page*”
 - *a complete list of authors*
 - *a detailed description of the doctoral candidate’s contribution*
 - *a full bibliographic reference available”*

Publish your thesis while respecting copyright rules
