Beer & Good Grades
Can drinking more beer at satellite improve your grades?
Bassel Abdelmassih & Mehdi Krichen

EPFL Library, Love Data Week 2023
Data sources

- number of credits taken
- personal profile (age, gender, nationality, faculty,...)
- library loan history
- spending habits: amount spent at satellite & EPFL cafeterias
- sports center course registration
- grades
- association membership
The idea

Use Machine Learning to study correlation factors between academic success and student habits.

Give students an idea of the time students should be able to afford for leisure activities customized to their workload, faculty and background. This suggestion would be based on what other students have been taking as extracurricular activities, weighted by their success.
Results and impact

Bring awareness to the benefits of a balanced life.

Improve the experience of exchange students by providing them with informed time management guidance.

Towards empowering:

Task Force Mental Health & Well-Being
