Chemicals that ONLY have these pictograms can be stored outside of the ventilated storage area.

Explosive chemicals and compressed gases cannot be stored with any other chemicals.

Separate liquids and solids.

Chemicals that ONLY have these pictograms can be stored outside of the ventilated storage area.

In case of multiple hazard pictograms the following order should be considered:

- Not Compatible
- Store according to SDS Section 7 and 10
- Compatible

Note that two chemicals can have the same pictogram and still be incompatible!

Example: Acetic acid and triethylamine are both flammable, but cannot be stored together because they are an acid and a base.
