Sustainable & Eco-Responsible SC

Collaboration & Integrated Planning

## LEARN WITH ACADEMIC AND INDUSTRY EXPERTS

IML is unique in offering young and senior executives a supply chain education from well established academic research professors from internationally renowned universities for both technology and business.

Equal importance is placed on learning from senior management professionals at our partner organisations, which include many International Corporations and young companies, born at the EPFL Innovation Park.

Company visits bolster the learning experience.

## THE IML LEGACY

IML, originally called the International Institute for the Management of Logistics, was created in Lausanne in 1990 and in Paris in 1995 as a partnership between the École Polytechnique Fédérale de Lausanne (EPFL), the École des Ponts ParisTech, the group AFTRAL, and a large number of industrial and service companies. Today IML has also partnered with HEC Lausanne and several other international universities.

**IML is based at the College of Management of Technology of EPFL and is trusted and highly regarded by Industry in Switzerland, France and Internationally.**

## ABOUT IML COURSES

The IML Executive Masters and Certificates of Advanced Studies are conferred by the École Polytechnique Fédérale de Lausanne, one of Europe's most prestigious Universities, renowned for its technology innovation and research & development.

Courses are open to executives and future executives specifically interested in supply chain management; previous management experience is required. See [iml.epfl.ch](http://iml.epfl.ch)

The certificates are awarded 12 ECTS points (European Credit Transfer and Accumulation System).
