

Master of Science in CIVIL ENGINEERING

2-year program - 120 ECTS

The program includes a compulsory 8-week internship which can be extended to 6 months and combined with the Master's thesis.

Students may choose a 30 ECTS specialization or a 30 ECTS minor included in the options. They can also opt for two specializations or combine a specialization and a minor.

Specializations available:

- B Geotechnical engineering
- C Transportation and mobility
- D Structural engineering
- E Hydraulic engineering and energy

Minors recommended with this Master:

- Computational science and engineering
- Energy
- Engineering for sustainability (EngS)
- Integrated design, architecture and sustainability (IDEAS)
- Management, technology and entrepreneurship
- Urban planning and territorial development (DTU)

Career prospects

The EPFL civil engineering academic performances are top-rated at the international level. Its master curriculum is widely recognized for the high quality of its training and offers very good perspectives of professional insertion.

The increased demand in Switzerland for highly qualified engineers in the civil engineering sector provides excellent career prospects for our students. Civil engineering consulting firms, state administrations and construction companies all benefit from hiring our graduates. Furthermore, the scientific skills and the versatility of our engineers also allow them to pursue very diverse professional activities.

Whatever path you choose, you will collaborate with numerous partners from the domains of architecture, environment, sociology, economy, energy, or politics. The know-how of the Swiss civil engineers is very well respected abroad, which also opens the door to an international career.

	Specializations				Credits
	B	C	D	E	
Core courses					12
Building energetics					3
Dynamique des structures			D		3
Fundamentals of traffic operations and control		C			3
Geomechanics	B				3
Infrastructures et batteries hydroélectriques				E	3

Options					53
Computational geomechanics	B				5
Energy geostructures	B		D	E	4
Engineering geology for geo-energy	B				3
Géologie de la construction et de l'environnement	B			E	3
Geophysics for engineers	B				3
Innovation for construction and the environment	B	C	D	E	3
Slope stability	B				3
Travaux souterrains	B			E	3
Continuum mechanics and applications	B		D	E	6
Machine learning for predictive maintenance applications			D		4
Nonlinear analysis of structures			D		3
Programming concept in scientific computing	B				4
Selected topics in mechanics of solids and structures	B		D		3
Advanced composites in engineering structures			D		3
Advanced design of concrete structures			D		3
Composites design and innovation			D		3
Conception des constructions en bois			D		3
Matériaux et structures			D		3
Structure et architecture			D		3
Structures en métal, chapitres choisis			D		3
Advanced steel design			D		3
Ponts en béton			D		3
Seismic engineering	B		D	E	3
Structural stability			D		4
Structures existantes, bases	B		D	E	3
Structures existantes, chapitres choisis	B		D	E	3
Barrages et ouvrages hydrauliques annexes	B		D	E	3
Éco-morphologie fluviale				E	3
Hydraulique fluviale et aménagement des cours d'eau	B			E	3
Ondes de crue et de rupture de barrage				E	3
Urban hydraulic systems				E	3
Économie hydraulique				E	2
Thermodynamics of comfort in buildings				E	3
Decision-aid methodologies in transportation			C		4
Deep Learning for autonomous vehicles			C		6
Infrastructures de transport I	B	C			3
Infrastructures de transport II	B	C			3
Mathematical modelling of behavior			C		5
Transportation economics			C		3
Villes et transports			C		3
Analyse et gestion de risques	B		D	E	3
Analyse et management des risques industriels					3
Droit de la construction pour ingénieurs I	B		D	E	2
Droit de la construction pour ingénieurs II	B		D	E	2
Esthétique des ouvrages de génie civil			D		2
Études d'impact	B			E	3
Indoor air quality and ventilation				E	4
Management de projet et analyse du risque			C		4
Projet interdisciplinaire à option					4
Quantitative imaging for engineers	B		D		3
Research skills for engineers	B	C	D	E	2

Semester projects					16
Laboratoire GC					4
Projet ENAC ou UE architecture					4
Projet de construction					4
Projet de systèmes civils					4
Summer Workshop					4
UE génie civil: Construction durable ou Docta Manus					4
