Master of Science in MICROENGINEERING
2-year program - 120 ECTS

Industrial internship
The program includes a compulsory 8-week internship which can be extended to 6 months and/or combined with the Master’s thesis.

Students may choose a 30 ECTS minor within the optional courses. Recommended minors with this program:

- Biomedical technologies
- Computational science and engineering
- Data and Internet of Things
- Energy
- Engineering for sustainability
- Management, technology and entrepreneurship
- Photonics
- Space technologies
