Master of Science in MICROENGINEERING

2-year program - 120 ECTS

Admission criteria

EPFL Bachelor's degree in Microengineering.

A Bachelor's degree in Computer Science, Electrical Engineering, Mechanical Engineering, or any related field with an interdisciplinary background and an excellent academic record may also be accepted. However, candidates must master at least two of the three following fields: computer science, electronics, and mechanical engineering. Additional credits to fill any gaps may be required.

Career prospects

The EPFL MSc in Microengineering opens a broad range of career opportunities in research departments and manufacturing units over the entire industry spectrum, from start-ups to multinational groups. Microengineers are highly sought after in high-tech sectors, where their solid and broad profile empowers them to lead research and development, as well as to oversee production in industries ranging from aerospace and medtech to the watch industry.
