

Courses information

Study plan

The study plan of the EDMX program requires a minimum of **12 ECTS credits** (European Credit Transfer and Accumulation System) and a maximum of 30 ECTS credits. The **total credit requirement** may be obtained by successfully passing doctoral courses and Master courses in EDMX, in other doctoral program of EPFL, or in a Swiss or foreign University with the approval of your supervisor and the EDMX program director. During the first year of the doctoral studies, you must obtain at least **4 ECTS credits of these 12 credits**.

No credits are given for Bachelor courses.

4 credits – but not those required for the first year – out of the total required amount (12 or 30) can be chosen by the doctoral student without the approval of neither the program committee nor the thesis director. These 4 credits – free of approval – can be chosen from all EPFL doctoral program's course lists as well as from the Transversal Skills courses, open to all doctoral programs.

A maximum of 4 credits can be obtained from the **Transversal Skills courses** and will count from the second year.

EDMX courses

The [EDMX coursebook](#) webpage provides with the full range of courses offered in EDMX with their description on a PDF document.

Each upcoming course is announced per email to our PhD students with the related schedule and is mentioned on the [EDMX upcoming courses](#) webpage. Please register only to the listed courses to avoid unwanted information on your statement of results.

Course registration for doctoral students

You can register using the portal IS-Academia, manage and consult your registrations for the current academic year. The registration implies automatically to take the exam. If you do not want to take the exam, please tick the appropriate field.

Please note that your thesis director must imperatively give you his consent to the chosen courses.

For some courses, such as CCMX courses, it is required not to register on IS-Academia as usual. This specific information will be mentioned in our email and on the [EDMX upcoming courses](#) webpage.

Deadlines for registration

Please register to a course before it begins. For doctoral courses you can do it until the examination. For Master courses you have until the second Friday of the semester to register. If you miss this deadline, you will no longer be able to register on IS-Academia. You will need to go in person to the [Student Services Desk](#) and pay a late-fee registration (CHF 50.-).

You can cancel a registration by sending your request

- for a doctoral course to cours-edoc@epfl.ch until the examination
- for a Master course to student.services@epfl.ch until the tenth week of the semester.

Please send an email to edmx@epfl.ch if you have a problem with the registration.

MSE-470 “Seminar series on advances in materials” - Mandatory Master course during the first year

To apply at the candidacy exam, every PhD student has to attend 10 seminar talks during their first year before passing the candidacy exam.

Type of teaching

The course **MSE-470 “Seminar series on advances in materials”** consists of 12-14 scientific talks per semester. The attendance to all these talks is strongly recommended. The students are expected to take their own notes and do literature research concerning the background of the talks (presentation slides will not be distributed).

Credits / Form of examination

There will be one final written examination. For this purpose, the 12-14 talks will be divided into three groups (according to their topic) of 4-5 talks, which will be announced towards the end of the semester. In the examination, the students will choose one of the three blocks of questions (one for each of the group of talks). Accordingly, the students are expected to prepare in depth for one of these three groups of talks, that is, for the content of 4-5 of the seminar talks, using their own notes and doing literature research on the topics of the respective talks.

This course gives 2 Master ECTS. Please inform us if you want to obtain the credits and pass the exam. In both cases, you have to collect the signatures on the attendance list form distributed by the EDMX Office by registering you in Moodle.

For external Students

You can follow the seminar series through zoom, the link is available on the course Moodle page. Please sign up to this page as it is the primary form of communication with students.

Courses followed by MOOCS, in external institutes or universities

You can also attend courses by MOOCS (Massive Open Online Courses) and also Summer school or Winter school given in external institutes or universities. Please get firstly the approval of your supervisor and then send us the program of the course you want to follow. We will submit it to the EDMX program director for credit approbation. Take note that workshops do not give credits. If no examination is provided by the organizer, you will need to be examined by your thesis director or co-director on that topic and complete the **course equivalence form**.

Doctoral courses

The coursebook gives the description of all doctoral courses scheduled during the current academic year.

For relevant information about courses schedules, as well as courses recommended by your program, please consult the home page of your doctoral program.

Evaluation of the EDOC courses through IS-Academia

At the end of each EPFL course followed, you will receive an automatic request by email asking to complete an online evaluation. Please take time to complete it. The evaluation of teaching plays a significant role in improving the quality of student learning.
