

Laboratory of the Physics of Biological Systems (Rahi lab)
Institute of Physics
EPFL

PhD student position in biophysics / systems biology

We would like a PhD student to join us who is interested in research at the intersection of physics and biology. We are a dual experiment-theory lab. A good fit is somebody keen to do both. Our interests are in biological error correction, gene-gene interactions, evolution, and information processing in the brain. Specific projects change and can be shaped by the student. Email us (sahand.rahi@epfl.ch) if you are interested.
