

IS-Academia Guidelines

Jury Proposal for the Oral Exam

Organisation of the oral exam

Help Record without submitting Submit the jury proposal

Mandatory Fields

Phase 1/3

Important message
 In this first stage, you are required to enter all the information with regard to the organization of your oral exam.
 Once you have completed this step, please print and sign your jury proposal, have it approved by your thesis director (and, where applicable, by your thesis co-director) and hand it in to the administration of your doctoral program

Thesis title

Your thesis title will be used by different partners in the process who use diverse tools (Repro printing, library and Mediacom). Sometimes these tools are unable to correctly use or display special characters. It is thus important to have at least two distinct titles in order to make sure that the initial meaning is kept in all situations. The titles will as well be used in the invitation to the jury members as in any communication related to the oral exam. Once validated, the title cannot be modified. Corrections could be added after the oral exam. This title is required, it should be simplified in order to be used by library indexing tools.
