Using Kaltura Capture

Editing

Understanding the prerequisite

Everything you should know about how to record your class using Kaltura is in [this Quickstart guide](#)

Editing : Understanding the prerequisite (quick recap)

- Login in <https://mediaspace.epfl.ch>
- Download Kaltura Capture in the « +add new » tab
- Ask for a channel : it is not automatic - fill in a quick form on line.
 - Documentation on the EPFL website :
<https://www.epfl.ch/campus/services/website/fr/publier-sur-le-web-epfl/publier-des-videos/>
- Record your video directly on your mediaspace and locally on your computer by pressing on the « Kaltura Capture » button and following the steps.
- Pause the recording if you take a quick break or stop it when it is done. The video will then process (encode) before to be saved.
- The video is available online and locally. Online you will see just one video with all video sources merged but locally each video source is a separate video file. It is useful for advanced editing.
- Click the « upload » button to upload it privately to your mediaspace.

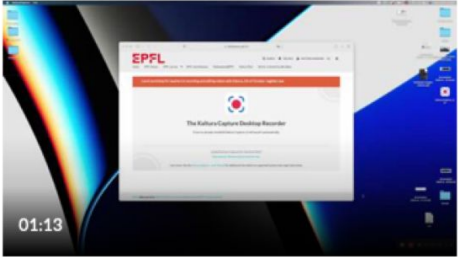

Editing : Online on Kaltura mediaspace (1/2)

Useful informations about how to edit directly in Kaltura can also be found in [the Kaltura Quickstart guide](#)

Editing directly inside mediaspace is great for quick and easy edits like cutting the beginning or the end of your lecture, or the break in the middle.

- First, find the video that you want to work on and click on the 'edit' icon

- **Video metadata Interface** : On the bottom of your page you will find different options about your video: Details, Publish, options, captions, timeline (for chapters, adding slides),...

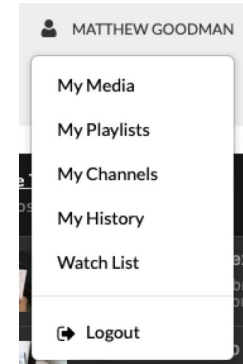

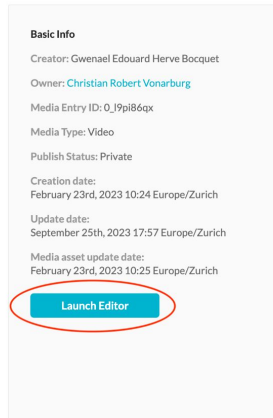

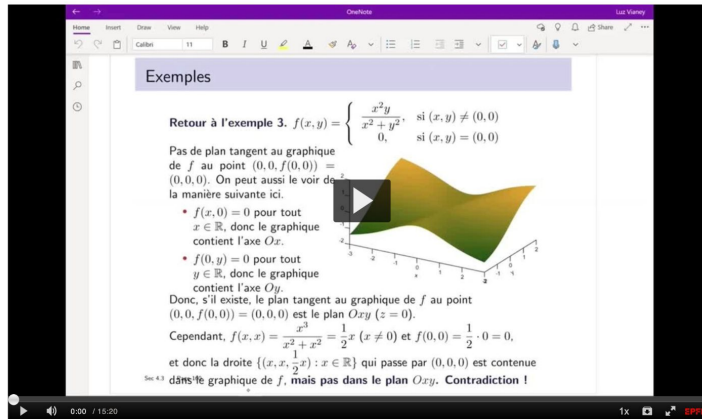

[Details](#) [Publish](#) [Options](#) [Thumbnails](#) [Presenters](#) [Downloads](#) [Captions](#) [Attachments](#) [Timeline](#) [Replace Media](#)

Editing : Online on Kaltura mediaspace (2/2)

- Press on the « launch editor » button to see the **editing windows** and features: hotspots, quizz and cutting of your video (for splitting or for deleting useless parts).

ZOOM recording examples

- Managing videos** : Click on your name on the top right corner. This is for creating playlists, uploading pre-recorded videos (e.g, old zoom recordings)...

Editing : Semi-pro: Editing software like Adobe Rush

If you want to go a little further with editing, we recommend that you use some **professional video editing software**. Using a software will allow you to do more complex actions like adding music, adding a custom title in the beginning or credits at the end, deleting all the silences or mistakes in the middle your video, adding pictures, whatever you want!

We recommend using Adobe Rush, as you have a free licence on Adobe products with EPFL. It is an easy-to-use software, suitable for beginners.

- login in <https://distrilog.epfl.ch/>
- Download Adobe Rush
- Online documentation : video tutorials : <https://mediaspace.epfl.ch/channel//29275>
- Workshops organised on request at CEDE

You can also try other free editing software like **Capcut** (great and easy-to-use software, especially good for social media type video or for captioning) or **DaVinci Resolve** if you already have experience with editing and want a complete and professional editing suite with tons of options.

Editing : Pro: Final Cut Pro X @ CEDE

The ultimate editing possibility is to ask for professional editing services at CEDE. We can help you convert your videos into an Online Course. We can work with videos coming from Kaltura recordings, zoom recordings, in class recordings or home recordings.

Exemple:

- **JC Chapelier** : classroom rec with built-in mic and cam :

https://mediaspace.epfl.ch/channel/CS-119%28d%29+Information_+calcul_+communication+%28SMA+%26+SPH%29/30888

- **Kathryn Hess** : home recording: iPad + mic :

<https://mediaspace.epfl.ch/channel/Théorie+des+groupes/29048>

- **Nicolas Boumal** : classroom rec, SAVE equipment, iPad :

<https://mediaspace.epfl.ch/channel/MATH-512+Optimization+on+manifolds+2023/31836>

You can also come directly come in CEDE's recording studios to record your videos and make a complete Online Course !
