NGO Name	**Theme**	**Challenge**	**Contact**
Office of the High Commissioner for Human Rights	Online attacks	Combating online attacks against human rights defenders. We have reviewed academic literature on detecting trolls & bots, coordinated activity, contextual anomalies and authorship attribution with interest and are looking for partners to develop these methods onto detection tools for online attacks against human rights defenders.	George Hodge ghodge@ohchr.org
Human Rights Watch	Sensors/Reporting	Can humanitarian agencies use passive acoustic ground sensors and a networked GPU with pre-trained AI/DL sound ranging ballistic models to send real-time alerts (e.g. detonation coordinates, munition type, fire-bearing) on unlawful attacks on protected hospitals and refugee camps in conflict zones like Syria and Yemen?	Josh Lyons josh.lyons@hrw.org
