

## Empowering startups to grow into responsible businesses

Levo is the go-to solution for integrating sustainability into the DNA of every new business. We empower startups to assess, monitor, and continuously enhance their sustainability performance and impact. At Levo, we envision a world where every startup embraces sustainability as a core principle right from the start.

### How It Works

Our Levo framework is the result of rigorous research and the only assessment tool tailored for startups, focusing on two pivotal aspects: Operational Sustainability and External Impact. Through our user-friendly and intuitive digital platform, we allow users to assess both aspects:

- **Operational Sustainability Assessment (OSA):** We apply ESG criteria uniquely adapted for the startup environment to evaluate the alignment of your operations with recognized sustainability standards.
- **External Impact Chart (EIC):** We review the effects of their products and services on customers, users, society, and the planet, whether these impacts are positive, negative, intended, or unintended. We also help startups align their activities to the UN Sustainable Development Goals (SDGs) and establish indicators for future success.

But we don't stop there. Levo provides customized recommendations for improvement and a goal-setting tool. Additionally, we offer monitoring and review services upon request.

For investors and accelerators, we additionally offer:

- **White Label Impact Measurement Platform:** get an overview of your investment portfolio's impact and sustainability performance
- **On-Demand ESG & Impact Support:** We offer ESG and impact support for portfolio startups

### Our Vision

We believe in a world where every new startup is created with the **future in mind**. Where sustainability is a building block of a successful strategy and baked into the DNA of all startups. Where their success is measured not just by financial metrics but also by operating sustainably and creating a positive social and environmental impact on the world around them.
