Two Post-doctoral Fellowships in Organic Chemistry and Protein Synthesis

Laboratory of Molecular and Chemical Biology of Neurodegeneration
Swiss Federal Institute of Technology Lausanne
Lausanne, Switzerland

December 1, 2020

Two post-doctoral positions in Chemical Biology are available immediately in the Laboratory of Chemical Molecular Biology of Neurodegeneration (<http://lashuel-lab.epfl.ch/>) at the Swiss Federal Institute of Technology in Lausanne (EPFL), Switzerland (www.epfl.ch). The applicant must have a Ph.D. degree in organic/bioorganic chemistry with a strong publication record and demonstrated experience in at least two of the following areas; 1) organic synthesis; 2) peptide and chemical synthesis and semisynthesis of proteins; 3) synthesis of unnatural amino acids and novel probes to study protein structure and function. Additional experience in protein biophysics and/or protein biochemistry is a plus.

We are looking for highly motivated and enthusiastic scientists with a Ph.D. degree in Chemistry, Biochemistry or Chemical Biology. Candidates with experience and demonstrated track record in chemical synthesis and semisynthesis of proteins and working at the interface of chemistry and biology are encouraged to apply. Very good writing and communication skills are important, and the ability to be a team player is a must.

The qualified candidate will benefit from working in very dynamic and multidisciplinary group in a highly collaborative and stimulating environment and will have access to state of the art laboratories and core-facilities and a competitive salary.

For more information about our group, please visit our website and review our recent publications at <http://www.ncbi.nlm.nih.gov/pubmed/?term=Lashuel>
