

Workshop for PhD students

5-6 September, 2024

École Polytechnique Fédérale de Lausanne

EPFL

Lausanne, Switzerland

EPFL

SCOPE

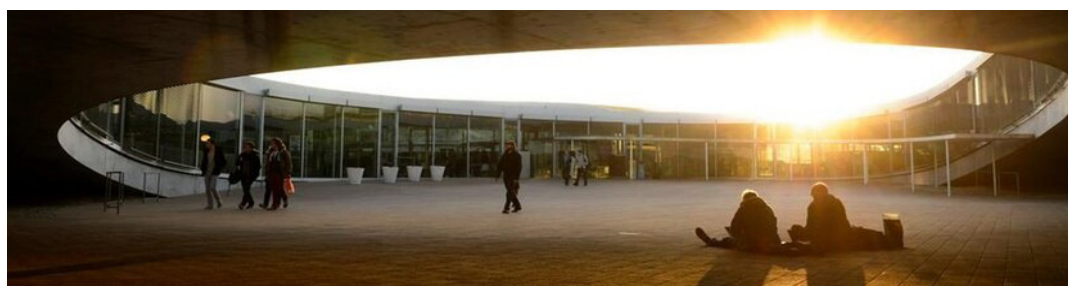

LumeNet, a specialized workshop focused on research methodologies for PhD students exploring lighting and its associated topics offer an enriching platform for academic discourse and knowledge exchange in the field. The next LumeNet workshop is on **September 5th- 6th, 2024**. This event will be organized by the LIPID Lab at **EPFL in Lausanne, Switzerland**.

The main subjects of the LumeNet Workshop 2024 are:

- Light and lighting perception
- Physiological effects of light
- Electric indoor and outdoor lighting: visual and energy aspects
- Daylighting: visual and energy aspects

By attending the LumeNet you will:

- Gain valuable **feedback and insights** from a panel of international researchers and peers to refine your research project.
- Get **advice, suggestions and recommendations** on open questions.
- **Networking opportunities** to connect with the other PhD students focusing on lighting research.

INFORMATION

During the Workshop, you will have the occasion to:

- Give a short presentation about your research in small themed groups followed by a thorough discussion lead by two experts
- Discuss any open question in a friendly, supporting environment
- Listen to keynote presentations from Marilyne Andersen and Manuel Spitschan

Register and submit your abstract!

LumeNet is free of charge with no registration or admittance fee for PhD students, but you need to cover travel and accommodation. To register, please submit a maximum two-page abstract about your research, in English and send it to:

lumenet2024@epfl.ch

Submitted abstracts may include a section about the experimental approach, the interpretation of data or the set-up of new experiments. There will be no selection of contributions, except when capacity limitations urge us to do so.

Important dates

- Abstract submission deadline: **June 30th, 2024**
- Acceptance notification: **July 15th, 2024**

Academic experts

Following experts will be present at the LumeNet workshop to offer their experience and advice and also to present some of their work in lighting research.

Myriam Aries (Jönköping University)
Laura Bellia (Universita' degli studi di Napoli)
Jens Christoffersen (Velux)
Juliëtte van Duijnhoven (TU Eindhoven)
Steve Fotios (University of Sheffield)
Valéry Ann Jacobs (Vrije Universiteit Brussel)
Manuel Spitschan (TU München)
Jan Wienold (EPFL)
