Master Trainee in Operations, Scientific Services team

“I want a direction to follow and challenges to stretch me”

Nestlé Research, Nestlé Institute of Health Science
Lausanne, Switzerland

Internship (6 Months)
activity rate 100%
start date: tbd, 2022

For our Scientific Services team, part of the Operations Department, we are looking for a motivated Master’s student to contribute to a digital development project aimed at revolutionising laboratory assets management.

Nestlé Research is based in Lausanne, Switzerland and employs approximately 800 people. It consists of four major research institutes: Health Sciences, Material Sciences, Food Safety & Analytical Sciences and Packaging Sciences. Nestlé Research combines fundamental science at the highest level, high-end analytical platforms leveraged by all research teams, and strong prototyping capabilities to accelerate the translation of science into innovation. Nestlé Research published around 1,000 scientific publications in peer review journals over the last five years, and files about 80 patents every year. Nestlé Research collaborates with approximately 100 universities or research institutes around the world. Learn more about Nestlé Research at www.nestle.com/randd

As a Master Trainee in our Operations department, your main activity will be to develop digital tools to drive the digital transformation of laboratory assets management at Nestlé. You will contribute to the Scientific Services team activities and work on interdisciplinary projects.

Key responsibilities

- Develop digital tools for laboratory assets management and to enable sharing across multiple sites, including online mapping, usage monitoring and scheduling
- Contribute to cross-functional development projects with Operational teams
- Updates of the Laboratory Instruments Management System and continuous improvement
- Preparation of data analytics for reports and presentations e.g. PowerBI, Murals

Education and experience

- Master student in Sciences, Engineering, Electronic or Communication Systems
- Experience ideally in digital tools or project management
- Good knowledge of MS tools and databases management
- Exposure to LIMS and laboratory work would be a plus
- Languages : Good level in French and English (written and spoken)

Your strong work ethic, skills and interest in digitalization will be key to contribute to the success of your internship. If you are a motivated student interested in digital transformation and operations management, don’t miss this opportunity and apply with a CV and cover letter in English at Cedric.Charrier@rd.nestle.com

The Nestlé Group is the world’s largest food and beverage company with 91.4 billion Swiss Francs in sales in 2018. It is present in 190 countries around the world, has 413 factories and its 308,000 employees are committed to Nestlé’s purpose of enhancing quality of life and contributing to a healthier future.
