

## **Project n°4: Personal IDentity in Agile work spaces**

Proposed by: Logitech

Company description:

Logitech designs products that have an everyday place in people's lives, connecting them to the digital experiences they care about. With our employees we foster an inclusive culture where they can bring their whole selves to work, fully contribute their skills and talents and be valued and supported. More than 35 years ago, Logitech started connecting people through computers, and now it's a multi-brand company designing products that bring people together through music, gaming, video and computing. Brands of Logitech include [Logitech](#), [Ultimate Ears](#), [Jaybird](#), [Blue Microphones](#), [ASTRO Gaming](#) and [Logitech G](#).

Project description:

In a shared workspace environment like activity based working or co-working where “hot desking” is the norm, how might Logitech enable the workspace (desk or meeting room) to automatically and seamlessly adapt to the needs and preferences for each new user?
