Ellipsometer SOP complementary

1. The system is ready when the “lights” stop blinking, like so:

![Ellipsometer Lights](image)

2. Here you can find the recommended focus settings:

![Focus Settings Table](image)

3. Here you can find the recommended measurement settings:

![Measurement Settings](image)
4. Focus troubleshooting:

**Flat line:**
- Check the microspots
- Visually check that the Xenon lamp is on
- Check your sample thickness
- Check your sample absorption

**Peak too far left:**
Increase Sample Thickness by ~ 300 µm

**Peak too far right:**
Decrease Sample Thickness by ~ 300 µm
