

Acknowledgements:

Should the work that you conduct at the CIME contribute to a research publication, you can include in the Acknowledgments section of the publication a clause analogous to the following:

- Use of equipment

(Part of / some of) These experiments have been conducted on the equipment in the electron microscopy center of EPFL, CIME. We thank the CIME for support and assistance.

- Personal support

We also encourage you to acknowledge the specific CIME staff members who were involved in your research by name

We thank Dr. NAME of the CIME for his/her support during the experiments/ fruitful discussions/ support in data analysis/ support in specimen preparation etc..

- Acknowledging of full service

The diffraction analysis/HRTEM analysis/ STEM Imaging/EDX Analysis... has been performed by Dr. NAME at the electron microscopy center CIME of EPFL. We thank her/him for his contribution to this work.

The paper shall be linked in info-science to the CIME

Co-Authorship:

If CIME staff members were instrumental in any of the following activities that contribute to a research publication:

- obtaining and interpreting critical results AND writing of the respective part of the publication
- providing substantial help in designing of an experiment and providing substantial assistance in the execution of experiments, and/or performing advanced analysis of data, plus participation in writing of the manuscript then such members would be expected to be listed as co-authors of the forthcoming publication. The decision on co-authorship will be discussed by all members of the research team constructively, in line with the guidelines of SNF.
