

Swissquote Conference 2019 on Artificial Intelligence in Finance

Miquel Noguer i Alonso (AIFI)

Title: Latest developments in Deep Learning in Finance

Abstract: Deep learning is showing excellent results in areas like image recognition, natural language processing and reinforcement learning.

The theoretical explanation still remains a very fertile area of research.

We will explore the qualitative, mathematical and experimental results of deep learning architectures in Finance.

Will these deep architecture provide state of the art results in different finance domains?
