

LA VITA E BELLA FROM ROOM TO CITY KUENG CAPUTO

La Vita è Bella examines architecture as an active process to increase quality of life. We analyse our immediate environment and intervene on-site in the urban reality.

Through sketching, walking, talking and building we acquire knowledge and uncover new potentials and perspectives, which are directly tested in practice through the 1:1 prototype.

TEAM

Lovis Caputo

Michelle Geilinger

Nicolas Rothenbühler

WORKSHOP

Susanne Kaelin

GUEST CRITICS

Gian Trachsler

Li Tavor

Some practical information, that might be good to know for the students:

The Room: You will build a 1:1 intervention in your bedroom.

Sleep Over Week: During one week, each student sleeps in the room of a fellow student.

You will work alone and in groups of two up to five.
