

CLEAN WATER INITIATIVE

6-Month Full-time Internships 1-3: The Clean Water Initiative is looking to hire interns focused on incubating filter technologies produced out of the Laboratory for Functional Inorganic Materials. This position can start as early as January 2020.

Applicants: The candidates should have a bachelor-level degree in chemistry, chemical engineering, process engineering, or a related field. All interested candidates are encouraged to apply. Projects will consist of optimizing quality control and structuring protocols, construction of filter devices and modeling and optimization of filter devices in dynamic continuous flow operations. All work will be conducted in the Laboratory for Functional Inorganic Materials.

Location: The positions are located at the chemistry campus of EPFL-ISIC-Valais in Sion, Switzerland.

Please email your application to Daniel Sun at daniel.sun@epfl.ch. Please include a detailed CV, statement of intent, and the names of references. Candidates are required to work full time Monday through Friday for 6 months. These hours are in line with Master thesis projects.
