

MS platform – Sample submission procedure during EFPL restart, May 2020

Entrance to the MS platform (Labs and office) is not permitted.

Please discuss with us by email when needed (discussion of experiments, planning, sample submission, fragile samples that need to be kept at 4 or -20°C etc.)

Lausanne, BCH:

- A table will be placed outside the lab in the corridor, where you can deposit samples for MS analyses in the racks as usual, depending on the type of analysis you need.
- No open access MALDI-TOF and ESI-MS allowed. We can run the samples for you, but be aware that the throughput might not be the usual one. We do our best in this special period.
- No access to the balances, Speedvac and microscope is permitted until further notice.
- No paper reprints of results will be provided. Please favor as much as possible eln results. Else, spectra can be sent by email as pdf (under request only).

Sion, I17 0 H3:

- A table will be placed outside in the central corridor I17 2 K4, where you can deposit samples for MS analyses in the racks as usual.
- No open access MALDI-TOF and ESI-MS allowed until further notice. We can run ICP-OES the samples for you, but be aware that the throughput will not be the usual one. We do our best in this special period.
- No access to the Micro-waves, RI, fluorescence, particle size analyzer and LC-UV is allowed until further notice
- No paper reprints of results will be provided. Please favor as much as possible eln results. Else, spectra can be sent by email as pdf (under request only).
