Laboratory of Electrophiles And Genome Operation (https://leago.epfl.ch) actively seeks to recruit 1-2 PhD students keen to acquire interdisciplinary skillsets in the realms of pioneering novel chemical biology methods and screening technologies, and discovering and mechanistic understanding of druggable protein targets/pathways toward precision medicine development. Our multi-award-winning research programs leverage a unique blend of relevant models and cutting-edge concepts and techniques at the frontiers of chemistry and biology. For more information, please reach out to yimon.aye@epfl.ch

It should be noted that this position requires acceptance into the EPFL doctoral program. Please refer to this website to apply.
